

2026 ITP Constraint Assessment Posting (East Interconnection)

A revised list of constraints and yearly event files for use in the 2026 ITP Assessment have been posted to [GlobalScape](#) for stakeholder review. The constraints in this list include:

- 1) SPP and NERC permanent and temporary flowgates 100 kV and above;
- 2) Future and study year specific 100 kV and above constraints identified in the constraint assessment process that utilized the market economic model (MEM) dispatch;
- 3) Select 69 kV SPP permanent and temporary flowgates, and SPP stakeholder-provided/SPP-validated 69 kV constraints that are affected by generation dispatch; and
- 4) SPP and NERC interfaces

- **Action Required**

SPP requests that stakeholders review the posted list of constraints and be prepared to vote on the 2026 Constraint Assessment at the next TWG meeting. A delay in approval may delay the opening of the DPP window; therefore, it is imperative that feedback be provided in advance of the meeting.

- **Entities Required to Provide Feedback:**

N/A

- **Due Date and Method of Submittal**

Any questions or feedback should be submitted through the SPP Request Management System (RMS) using the "Submission" Type "Integrated Transmission Planning (ITP)" Issue Subtype 1 and "Data Submission" Issue Subtype 2.

- **Changes from Last Pass**

- 1) Incorporated stakeholder feedback
- 2) Removed invalid contingency (4 + WRNMEDT4 138 - 81YALTP4 138 [1])
- 3) Removed unnecessary branches monitored in base case
- 4) Added constraints from B-GEM analysis
- 5) Added 765 kV branches to be monitored in base case
- 6) Rating corrections

- **DO NOT RELEASE NOR SHARE THIS MATERIAL with any person or entity who has not executed a Confidentiality Agreement or who is ineligible to receive confidential and protected material (such as a Competitive Duty Personnel).**

- **File location on [GlobalScape](#)**

For users who have signed an SPP non-competitive duty NDA:

These files can be found on GlobalScape under: ITP → ITP → NCD (CEII, RSD) → NDA → 2026 ITP → "Constraint Assessment Recommendation" folder.

File Name	Description
2026 ITP Constraint Assessment_02042026.xlsx	Workbook containing list of SPP and NERC permanent and temporary flowgates, SPP MEM constraints, 69 kV constraints, and SPP and NERC Interfaces to be utilized in the 2026 ITP cycle
2026 ITP_E011_Constraint Assessment Event File_Y2_02042026.eve	Year 2 event file
2026 ITP_E011_Constraint Assessment Event File_Y5_02042026.eve	Year 5 event file
2026 ITP_E011_Constraint Assessment Event File_Y10_02042026.eve	Year 10 event file
2026 ITP_E011_Constraint Assessment Event File_Y20_02042026.eve	Year 20 event file

- **Helpful Links and Access**

- As of 2/2/2026, the SPP Request Management System (RMS) is using a new platform to manage stakeholder questions and requests. For more details, please see spp.org.
- If you do not already have access to these documents on [Globalscape](#), see the instructions for [confidentiality agreements](#) and submit the appropriate form via [RMS](#) using "Access" **Type**, "Add User" **Issue Subtype**, "Globalscape File Sharing" **Issue Subtype 2**, and "SPPDocushare / Engineering / TCR Models" **Issue Subtype 3**".
- If you encounter issues with [Globalscape](#), please try the following recommendations:
 - Clear your cache, close all browser tabs and reopen browser
 - Try using Microsoft Chrome or Microsoft Edge with the incognito (private browsing) mode
 - Try typing the URL directly into the address bar and not allow the browser to complete your URL nor use a saved link
 - If the recommendations above do not resolve your issue, submit a technical support request via [RMS](#) using "Technical Support" **Type** and "File Share (Globalscape, SPP Docushare, xfer)" **Issue Subtype**
- Other helpful links can be found on <https://www.spp.org/engineering/>.
