

2025 ITP Constraint Assessment Final Posting for Approval

- **Action Required**

The **updated final** list of constraints for the 2025 ITP has been posted to [GlobalScape](#) for the Transmission Working Group's (TWG) approval. The constraints in this list include:

- 1) SPP permanent flowgates
- 2) Future and study year specific 100 kV and above constraints identified in the constraint assessment process that utilized the market economic model (MEM) dispatch
- 3) Select 69 kV SPP permanent and temporary flowgates, stakeholder submitted and SPP validated 69 kV constraints that are affected by generation dispatch
- 4) Interfaces and Nomograms

Stakeholder feedback received since the initial posting has been incorporated and changes are highlighted in the workbook. SPP staff plans to recommend the 2025 ITP constraint assessment for approval at the upcoming Transmission Working Group (TWG) meeting on December 10, 2024, for use in the 2025 ITP cycle.

SPP is **not** requesting changes to constraint assessment results. Any new changes submitted will be considered under Section 10.3 of the ITP Manual.

Note: Additional constraints may be added to the event files during the 2025 ITP Needs Assessment milestone if SPP staff finds it necessary for need identification.

- **Changes from Last Pass**

- File updates:
 - Ratings for the MHEB_SPC_W, MHEX_S, SPPSPSTIES, and SPSNMTIES and select monitored elements have been relaxed to allow for the event files to reasonably simulate congestion, and the relaxed ratings are included in today's posting of the event files and Constraint Assessment Recommendation file. The relaxed ratings are noted in the "SPP Staff Comments" columns for the Interface and SPP Market Economic Constraint tabs respectively.
 - Added constraints after performing additional PAT constraint identification runs with relaxed ratings
 - R-MEM Reliability Hour constraints have been added due to the Peak Hours determined for use in the R-MPMs being made final
 - Added constraints within 2025 ITP target area ([Southeastern SPP footprint](#))
 - Incorporated stakeholder submitted feedback
 - Removed of 69 kV constraints from previous ITP studies that had a congestion score of 0
 - Corrected ratings on various monitored elements
 - Removed constraints due to SPP exclusion rationale

- **Entities Required to Provide Feedback**

All interested stakeholders; primarily, TWG members

- **Due Date and Method of Submittal**

SPP will be seeking a motion for TWG approval on **Tuesday, December 10, 2024**, for approval of:

- SPP Permanent Flowgates (including 69 kV Constraints)
- SPP Market Economic Constraints
- 69 kV Constraints

- Interfaces and Nomograms

- **Material Disclaimer**

CONTAINS CONFIDENTIAL AND PROTECTED MATERIAL NOT AVAILABLE TO COMPETITIVE DUTY PERSONNEL – DO NOT RELEASE

- **File location on [GlobalScape](#)**

For users who have signed an SPP non-competitive duty NDA:

These files can be found on GlobalScape under: ITP → ITP → NCD (CEII, RSD) → NDA → 2025 ITP → in the “[Constraint Assessment Recommendation](#)” folder.

File Name	Description
- 2025 ITP Constraint Assessment Recommendation.xlsx	Workbook and event files containing SPP and NERC permanent flowgates, SPP MEM constraints, 69 kV constraints, SPP and NERC Interfaces to be reviewed for the 2025 ITP cycle
- 2025 ITP Constraint Assessment Event File_Y2.eve	
- 2025 ITP Constraint Assessment Event File_Y5.eve	
- 2025 ITP Constraint Assessment Event File_Y10.eve	

- **Helpful Links and Access**

- If you do not already have access to these documents in [GlobalScape](#), see the instructions for [confidentiality agreements](#) and submit the appropriate form *via the [SPP Request Management System \(RMS\)](#)*, using the “Initiate a System Access Action” **Request Template**, “Access” **Request Type** “Globalscape File Sharing” **Subtype 1**, “Add User” **Subtype 2** and “SPPDocushare / Engineering / TCR Models” **Subtype 3**.
